

High-pressure In-line Pumps 60 Hz

Movitec VE

Movitec V

Movitec LHS

Fields of Application

Movitec VE are employed for general water supply, sprinkling, irrigation and pressure boosting duties, for warm water and cooling water recirculation. They are installed in domestic water supply systems, washing plants, water treatment and fire-fighting systems.

Movitec V(S) and **LHS** are employed for general water supply, sprinkling, irrigation and pressure boosting duties, for warm water, hot water and cooling water recirculation, and condensate transport. They are installed in boiler feed circuits, domestic water supply systems, washing plants, water treatment and filter systems. They are used for degreaser baths/alkaline cleaning baths, alkalines and oils/emulsions, as well as for fire-fighting, reverse osmosis and surface treatment applications.

Design

Multi-stage, vertical (horizontal installation on request) high-pressure centrifugal pumps, with suction and discharge nozzles of identical nominal diameters arranged opposite to each other (in-line design).

Materials

Standard variants:

VE, V: All hydraulic components are made of stainless steel AISI 304

VS, LHS: All hydraulic components are made of stainless steel AISI 316

Bearings

All V, VS and LHS pumps are supplied with tungsten carbide plain bearing at the hydraulic rotor.

Movitec VE is supplied without bearing at the hydraulic rotor.

Shaft Seal

Single-acting, uncooled mechanical seal in accordance with EN 12756.

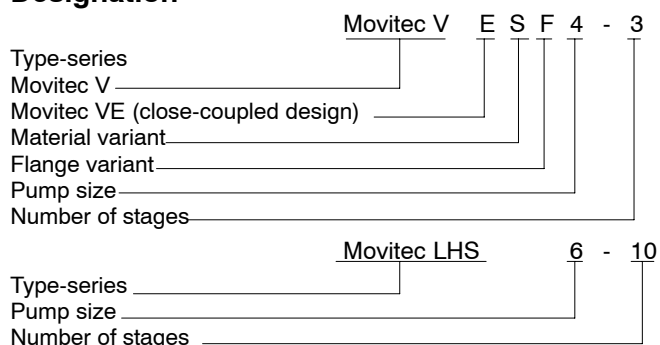

Drive

Electric motor, 50 Hz, air-cooled, 2- and 4-pole, standard KSB motor with main dimensions to IEC. Other motor makes subject to prior consultation with KSB.

Movitec V, VS, LHS with PTC resistors from 3 kW and up.

Variants: single-phase a.c. motor, frequency-controlled drives.

Designation

Material variants: blank or S, see page 3
 Flange variants/connections: blank = oval flange
 F = round flange
 V = Victaulic coupling
 E = thread (male)

Operating Data

Movitec VE

Capacities	Q	up to 9.7 m ³ /h, (2.7 l/s)
Heads	H	up to 57 m
Operating pressures	p _d	up to 10 bar ¹⁾
Operating temperatures	t	-15 °C to +60 °C

Movitec V(S)

Capacities	Q	up to 90 m ³ /h, (25 l/s)
Heads	H	up to 258 m
Operating pressures	p _d	up to 25 bar ¹⁾
Operating temperatures	t	-15 °C to +120 °C

Movitec LHS

Capacities	Q	up to 8.6 m ³ /h, (2.4 l/s)
Heads	H	up to 415 m
Operating pressures	p _d	up to 40 bar ¹⁾
Operating temperatures	t	-15 °C to +120 °C

¹⁾ The sum of inlet pressure and head at zero flow point must not exceed the value stated.

Conformity Marks

CE - ATEX group II, cat. 2 and 3

Selection Charts

$n \approx 3500$ 1/min

$n \approx 1750$ 1/min

¹⁾ The sum of inlet pressure and head at zero flow point must not exceed the value stated.

²⁾ Drilled to EN 1092-2 PN 25 (optional ASME B 16.1 Class 250 or JIS B2238 16K)

³⁾ Subject to application limits (see List of Media Handled)

Design Features Movitec VE

Universal pump up to 10 bar

- -15 °C to 60 °C

Space-saving vertical design

Easy-to service, robust motor

- multi-range voltage / frequency
- type of enclosure IP 55
- insulation class F

Leak-free and resistant to thermal shocks

- thanks to pump shroud
- due to confined O-rings

Reliable, easy-to-service shaft seal

- standardized mechanical seal to EN 12756

Special shaft of high-alloy steel with two flat faces for strong shaft/impeller construction

Corrosion-resistant:

- hydraulic parts and pump shroud of high-alloy stainless steel

Low noise, since the flow noise is dampened by water-filled shroud

High operating reliability

ensured by torsion-proof pump shroud

- no partition lines on the outside
- only 2 seal elements

Integrated non-return valve

Simple installation and piping layout thanks to in-line design with thread

- insusceptible to outside nozzle forces and moments

Design Features Movitec V(S)

Universal high-pressure pump
up to 25 bar

- -15 °C to 120 °C
- also for chemically aggressive media

Space-saving vertical design

Easy-to service, robust three-phase motor

- multi-range voltage / frequency
- type of enclosure IP 55
- insulation class F
- with PTC resistor

Leak-free and resistant to thermal shocks

- thanks to pump shroud
- due to confined O-rings

Reliable, easy-to-service shaft seal

- standardized mechanical seal to EN 12756

Easy-to-fit shaft of high-alloy steel with two flat faces for strong shaft/impeller construction

Low noise, since the flow noise is dampened by water-filled shroud

Corrosion-resistant:

- hydraulic parts and pump shroud of high-alloy stainless steel
- variant Movitec V features a pump of CrNi steelplate
- variant Movitec VS features a pump of CrNiMo steelplate

High operating reliability

- ensured by torsion-proof pump shroud
- no partition lines on the outside
 - only 2 seal elements

Highly wear-resistant and maintenance-free **plain bearing of tungsten carbide / ceramic**

- lubricated by the medium
- self-cleaning by forced flushing

Simple installation and piping layout

- thanks to in-line design
- insusceptible to outside nozzle forces and moments

Design Features Movitec LHS

Universal high-pressure pump
up to 40 bar

- -15 °C to 120 °C
- also for chemically aggressive media

Space-saving vertical design

Easy-to service, robust three-phase motor

- multi-range voltage / frequency
- type of enclosure IP 55
- insulation class F
- with PTC resistor

Leak-free and resistant to thermal shocks

- thanks to pump shroud
- due to confined O-rings

Reliable, easy-to-service shaft seal

- standardized mechanical seal to EN 12756

Corrosion-resistant:

- hydraulic parts and pump shroud of high-alloy stainless CrNiMo steelplate

Easy-to-fit shaft of high-alloy steel with two flat faces for strong shaft/impeller construction

High operating reliability ensured by torsion-proof pump shroud

- no partition lines on the outside
- only 2 seal elements

Low noise, since the flow noise is dampened by water-filled shroud

Highly wear-resistant and maintenance-free **plain bearing of tungsten carbide / ceramic** lubricated by the medium

- self-cleaning by forced flushing

Simple installation and piping layout thanks to in-line design

- insusceptible to outside nozzle forces and moments

Casing

Pump casing with suction and discharge nozzles of identical nominal diameters arranged opposite to each other (in-line design).

Movitec VE and V(S): stainless steel pump casing and baseplate made of cast iron with powder coating.

Movitec LHS: stainless steel pump casing.

Shaft Seal

The shaft seal is an uncooled, maintenance-free mechanical seal to EN 12756.

Drive

Standard for V(S) and LHS:

- Electric motor, 50 Hz, air-cooled, 2- and 4-pole, standard KSB motor with main dimensions to IEC. Other motor makes subject to prior consultation with KSB, up to 2.2 kW 220-240 V/380-420 V, 3 kW and above 380-420 V/660-725 V, type of enclosure IP 55, insulation class F, up to 4 kW design V18, 5.5 kW and above design V1, all motors with PTC resistor from 3 kW and up.

Approved variants:

- Explosion-proof motor II 2 G Eexd/Eexe T3/T4, design V1/V18, make acc. to our choice.
- Motor for 500 V mains voltage, design V1/V18, make acc. to our choice.
- Motor make acc. to customer's choice (upon request).

Standard for VE:

- Electric motor, 50 Hz, air-cooled, 2- and 4-pole, standard KSB motor with main dimensions to IEC up to 2.2 kW 220-240 V/380-420 V, type of enclosure IP 55, insulation class F. Motors with extended shaft.

Direction of rotation:

Clockwise, seen from the drive side (see arrow indicating direction of rotation on the motor stool).

Coupling (not on Movitec VE):

- All pump sizes: rigid coupling
- The couplings are in accordance with the EC Machinery Safety Directive.

Installation

Vertical installation (horizontal installation on request)

Coating

Movitec VE and V(S): Cast iron motor stool and baseplate with powder coating.

Movitec V(S): Cast iron slide flanges protected by sheradising process.

All pumps: Stainless steel parts without any additional protective coating.

Tests

Standard:

Pressure test according to EN 809.

Leak test with water.

Approved variant (upon request):

Hydraulic test evidenced by test report. This test is always carried out using the original motor.

The NPSH or the suction head are not measured.

Materials testing

Certificate of Compliance with the Order (corresponds to EN 10204)

In the certificate of compliance with the order the manufacturing or processing works confirms by way of an informal report without specifying test results that the delivery complies with the stipulations of the purchase order (certificate to 2.2 and 3.1 available upon request).

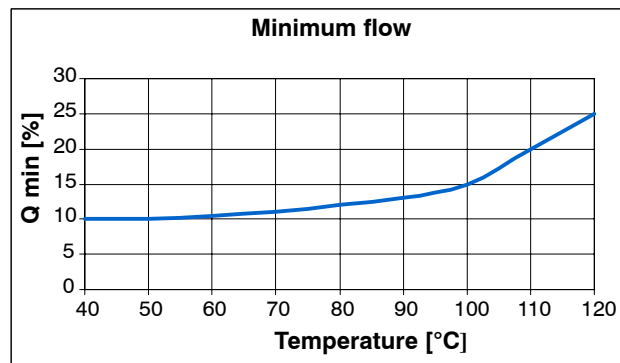

Characteristic Curves ²⁾

The characteristic curves are based on the following principles:

- Tolerances to ISO 9906, Class 2 / Annex A.
- The motors used for the measurements are standard KSB motors ¹⁾.
- The characteristic curves were obtained with deaerated water at a temperature of 20 °C and a density of 1.0 kg/dm³ ¹⁾.
- The characteristic curves are valid for a kinematic viscosity of 1 mm²/s (1 cst) ¹⁾.
- A minimum permissible flow must be maintained to prevent the pump from overheating (see graph).

Movitec V	Q _{min} in m ³ /h
2	0.3
4	0.6
10	1.2
14	1.0
18	2.4
24	2.2
32	4.0
45	4.6
65	6.1
LHS 6	0.8

The following curve shows the minimum flow, corresponding to a percentage of the optimum flow Q_{opt}, as a function of the temperature of the medium pumped (flow rate at best efficiency point).

- Maximum pressure at the discharge nozzle:
 10 bar – head at zero flow point with thread flange (VE).
 16 bar – head at zero flow point with oval flange (V).
 25 bar – head at zero flow point with round flange (VF) and Victaulic coupling (VSV).
 40 bar – head at zero flow point with round flange (LHS)

- **NPSH**

The NPSH values of the individual characteristic curves are minimum values corresponding to the cavitation limit; they refer to deaerated water.

A safety allowance of at least 0.5 m must be added when selecting the pump to compensate for measuring inaccuracies and minor manufacturing deviations. The NPSH curve reflects mean values.

¹⁾ In case of different parameters, the performance data must be corrected accordingly.

²⁾ See example on the following page.

Example

Baureihe-Größe Type-Size Modelle	Tipo Serie Tipo	Nennrotationszahl Nom. speed Velocità nom. Nominal rotational Revoluciones nom.	Velocità di rotazione nom. Nominal rotational Revoluciones nom.	Lauftrahde Impeller Dia. Diamètre de roue	ø Girante ø Washer ø Rodete

List of Media Handled

The data refer to the materials' chemical resistance. Relevant regulations / standards for pump applications have to be complied with.

The actual operating conditions must always be checked (concentration, temperature, solids content).

The penetration of air into the system must be avoided by all means.

If the operating conditions differ from the data given (e.g. mixed products) or if the media are not included in the table below, please contact KSB.

Basic data:

- Temperature ranges:
 - The reference temperature is 20 °C.
 - In the case of temperatures ≤ 0 °C, please contact KSB.
 - If the temperature exceeds > 50 °C, check and observe the fluid's vapour pressure.
 - Max. temperature = 120 °C, unless indicated otherwise.
- Max. concentration = 100 %, unless indicated otherwise.
- Mechanical seal of silicon carbide / carbon (Q1B): not suitable for media containing solids; this rule also covers particles developing as a result of salt crystallization at low fluid temperatures.
- Mechanical seal of tungsten carbide / tungsten carbide (U3U3): solids content max. 20 ppm (depending of particle size), with the exception of corrosive media. Media with a higher abrasive solids content are as a rule not permitted. (ppm = 1 mg/kg).
- Please note: High temperatures will increase corrosion (reference temperature = 20 °C).
- Under unfavorable conditions (increased temperature, deposits, long periods of standstill) chloride contents of more than 300 mg/l may result in local corrosion.

Medium handled (see special conditions given at the end of the table)	Content max. %	Temperature max. in °C	Mechanical seal variant

Wine (white, red)			40	V ¹⁾ /VE ¹⁾	-	-	-	LHS

1) Only valid if all standard (brass) plugs of the Movitec V are replaced by stainless steel plugs. Otherwise use a Movitec VS pump with the right seal.

2) The water treatment shall be in accordance with the VdTÜV guidelines for feed and boiler water in steam plants of up to 64 bar. The penetration of air into the system must be avoided by all means.

3) Pure media containing no abrasive solids.

4) Please contact KSB with detailed information on the fluid to be handled !
