Circular letter to all our Valued Customers

Re: New ICPlus family introduction

Dear Customers,

we are glad to inform you that our new family of 32x74mm panel mounting controllers is now complete!

Our **new ICPlus controllers**, available in two models:

ICPlus 902
ICPlus 915

replace all the existing IC901, IC902, IC912, IC915 controllers in our CR catalog, allowing to maximize the availability of products and improving inventory management.

They represent the complete 32x74mm panel mounting Eliwell offer to control temperature, pressure or humidity in small and light industrial application.

Family feeling with EW/ID Plus, unchanged connections versus the old IC and technical characteristics permit an easy upgrade to the new models and a smooth integration in applications that require the coexistence of controllers from different platforms in the same electrical panel.

The tested technical features and the new pleasant aesthetics make the **ICPlus 902** and **ICPlus915** controllers very interesting also for the OEMs, allowing safe and faster installation thanks to the compatibility with the newest Eliwell configuration tools: the controllers can be quickly configured with the new UNICARD, without the need to power them, making application customization flexible, easy and quick.

The User Interface, with 4 push buttons, has been simplified: the display with large digits and graphic icons allows also the end user to easily read and understand the operating state of the device.

Programming menus are simple and intuitive, for a quick start up and a rapid learning.

All the ICPlus family controllers can be integrated in both Eliwell and a third party supervising system, thanks to the on board ModBus protocol.

All codes of the **new ICPlus range** can already be ordered and delivered with the Eliwell standard lead-time, anyway in a short we will assure more rapid deliveries for the fast moving models included in our last Catalog 2013.

We remind you that also for this new family we will require a **minimum order qty of 6 pcs and multiples**.

Old IC range PHASE OUT

Old IC models can still be ordered for a certain period, as per the following schedule:

Models	Action	Starting date
IC 901-902-912-915 all models	10% Price increase	All new orders received from 01/04/2014
IC 901-902-912-915 All models	PRODUCTION STOP	December 31st, 2014

We are confident that with your support **ICPlus** will be a new success! We thank you for your attention and remain available for any further clarification you might need.

With our best regards

Eliwell Controls S.r.l.
